DUST COLLECTORS

Dry filters are suitable for most industrial applications where the dust collector can be shut off periodically to shake dust from the 100% cotton sateen filter tubes. Dry filters trap 98% of dust down to 1.0 micron.

Reverse pulse cartridge dust collectors (which trap 99.7% of dust down to 0.5 micron) allow non-stop, high-production blasting. The polyester-cellulose cartridges are automatically pulse cleaned for maximum filter efficiency. Worn cartridges can be replaced in minutes.

Dry Filters	Reverse Pulse Collector
5 sq ft filter area per tube 600 cfm DF 25 has tubes (125 sq ft) 900 cfm DF has 40 tubes (200 sq ft)	235 sq ft filter area per cartridge RPC-2 has two cartridges (470 sq ft)

BLAST/ RECLAIM SYSTEM

The Heart of ZERO's Blasting System

Our exclusive media reclaimers continuously extract dust and debris and return properly sized, usable media to the blast system. The standard reclaimer handles all non-metallic media. For metallic media, specify reduced ID conveying hose.

The versatile design of our 600-cfm and larger reclaimers lets you quickly adapt the system to your changing needs - add media hoppers, rubber liners, or pull-through dust-collection.

The reclaimer, mounted atop the pressure vessel, automatically refills the blast system with clean, recycled media.
